EDUCATION

Bachelor of Science in Computer Science - New College of Florida - Sarasota, FL
Associate of Business Management - Bryant & Stratton College - Albany, NY

August 2023 - May 2026
August 2022 - May 2023

LANGUAGES

Spanish - Native , **English** - Fluent

RELATED COURSES

Software Engineering, Intro to Python, Data Structures, Algorithms, Object Oriented Programming, Object Oriented Design, Discrete Math, Intro to R, Dealing with Data I, Computer Architecture and Digital Hardware, Web Programming, Calculus I

TECHNICAL PROFICIENCY

Python, Java, HTML, CSS, JavaScript, React, Django, SQL, Supabase, Google Workspace, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Suncoast Venture Studio - Sarasota, FL
Venture Planning Intern

August 2025 - Present

- Supported evaluation of early-stage startups by conducting market research, competitive analysis, and financial feasibility assessments.
- Collaborated with founders and mentors to refine business models and go-to-market strategies.
- Researched and evaluated tech stacks, large language models (LLMs), and AI integration opportunities to guide product and platform development.

Computer Science Department, New College of Florida -Sarasota, FL
Teaching Assistant: Software Engineering, Object Oriented Programming

January 2025 - Present

- Provided tutoring support to students struggling with object-oriented programming concepts, using one-on-one sessions and group workshops to enhance understanding application of these concepts in Java.
- Collaborated with the course professor to review and refine course materials, ensuring clarity, accuracy, and educational effectiveness before distribution to students.
- Graded assignments, offering detailed, actionable feedback to students that focused on both strengths and areas for improvement to foster skill development and academic growth.

Jane Bancroft Cook Library, New College of Florida -Sarasota, FL
Student Assistant

January 2024 - Present

- Modernized library resources by digitizing and archiving senior thesis documents, utilizing advanced scanning equipment to enhance accessibility and preservation.
- Enhanced visitor experience by providing reception services, assisting with inquiries, and directing phone calls to ensure efficient communication and visitor satisfaction.
- Supported educational technology integration by assisting visitors with makerspace tools, including 3D printers and virtual reality sets, fostering an innovative learning environment.

Athletic Admissions Department, New College of Florida - Sarasota, FL
Student Assistant

October 2023 - November 2024

- Assisted prospective student-athletes with the application process, ensuring timely submission of all required documents and maintaining communication to address any issues.
 - Conducted informative calls, offering personalized guidance to prospective students and their families about academic programs, campus life, and admission criteria.
 - Organized and managed the submission of application materials, streamlining the process to improve efficiency and applicant experience, and maintaining accurate records for compliance.
-

PROJECTS

MatchFit, Soccer Team Management App - Sarasota, FL

Present

Frameworks/Languages: React, Vite, Supabase (PostgreSQL), Tailwind CSS, Radix UI

- Built a full-stack web application using React and Supabase to streamline soccer team management for coaches and players. Implemented role-based authentication with multi-stage onboarding flow, enabling users to select their role (coach/player), create or join teams via auto-generated invite codes, and complete profile setup with position and jersey number assignment.
- Developed dynamic, role-specific dashboards with real-time team statistics using React and Framer Motion, displaying upcoming events, published lineups, and active roster counts. Built an interactive lineup builder enabling coaches to create game lineups with multiple soccer formations (4-4-2, 4-3-3, etc.), drag-and-drop player positioning on a visual soccer field, and publish lineups for player viewing.
- Implemented comprehensive event management system with multiple calendar views (monthly grid, weekly timeline, daily detail) using date-fns for date handling. Created roster management interface with position-based filtering and detailed player profiles including contact information, physical stats, and performance tracking.
- Leveraged Supabase's PostgreSQL backend with Row-Level Security (RLS) policies to enforce role-based permissions, ensuring coaches have full access while players view team-appropriate data. Integrated React Hook Form with Zod validation for form handling, and utilized Radix UI components with Tailwind CSS for a modern, accessible interface.

Vibing Sarasota, New College of Florida - Sarasota, FL

November 2025

Frameworks/Languages: React, Vite, Supabase (PostgreSQL)

- Built a web application using React and Supabase to showcase local businesses and attractions in Sarasota, Florida. Implemented category-based browsing (Beaches, Food & Dining, Hotels, Golf Spots, Shopping, Exercise Spots) and search to help users discover local spots.
- Built dynamic interfaces with React and Tailwind CSS, enabling users to browse curated listings, view business details with images and descriptions and access to Google Maps links. Integrated React Query for efficient data fetching and caching.
- Used Supabase's PostgreSQL backend to store and manage user-submitted suggestions. Implemented a "Suggest a Spot" form with validation and submission handling, allowing users to recommend businesses for a review and potential inclusion in directory.

Scent Society, New College of Florida - Sarasota, FL

May 2025

Frameworks/Languages: React, Vite, Django, Django REST Framework, JWT Authentication, Tailwind CSS

- Built a full-stack e-commerce web application for browsing and purchasing premium colognes using React and Django.
- Implemented gender-based product categories (Men's and Women's collections) with scent type filtering (Fresh, Citrus, Night, Spicy, Sweet, Floral, Romantic) to help users discover fragrances that match their preferences.
- Developed dynamic product interfaces with React and Tailwind CSS, featuring interactive image carousels for product details, realtime shopping cart management, and a multi-step checkout process with promo code validation. Implemented protected routes using React Router to secure authenticated user features like cart access and order placement.
- Built a secure Django REST API backend with JWT token-based authentication, email verification system for new user registration, and PostgreSQL-backed data models to manage users, product catalogs, and shopping cart persistence. Designed separate cart systems for men's and women's products with full CRUD operations for cart item management.

NSAE Web App, New College of Florida - Sarasota, FL

March 2025

Frameworks/Languages: Django, React

- Developed a comprehensive web application using Django and React for a non-profit animal shelter, aimed at boosting volunteer engagement and streamlining event management. Implemented advanced user authentication and registration systems to facilitate easy sign-up processes for new volunteers, enhancing user experience and organizational efficiency.
- Engineered dynamic user interfaces with React that allow registered volunteers to easily access information on upcoming events, log volunteer hours, and interact with the platform in a user-friendly manner.
- Leveraged Django's robust backend capabilities to enable detailed activity tracking and generate intuitive reports and dashboards for administrative staff. These tools provide critical insights into volunteer contributions and event success

Banyan Board, New College of Florida - Sarasota, FL

February 2025

Frameworks/Languages: HTML, Java, JavaFX

- Designed and implemented a user-friendly interface using HTML to provide real-time updates on campus events, homework deadlines, and other academic activities, enhancing student engagement and daily planning efficiency.
- Developed key features including a comprehensive to-do list, interactive pop-up messages, and robust student calendar functionalities using JavaFX. These features enable students to manage and track their academic tasks, stay informed about urgent updates, and efficiently plan their schedules with visual aids and timely alerts.
